Education

UC San Diego
Master of Science in Computer Science

Sept. 2023 – Present
San Diego, USA

University of Liverpool
BSc (honours) in Computer Science and Mathematics

Sept. 2017 – May 2020
Liverpool, UK

Experience

The Hut Group
Software Engineer

Dec. 2021 – Aug. 2023
Manchester, UK

- I led the experiment-able widgets project, which enabled the company to quickly and dynamically test changes to website's UI via A/B testing, leading to 60 new effortless experiments and estimated 5% increase in YoY revenue
- As a part of this project, I integrated an internal widget-serving backend together with a/b testing backend, as well as page-serving service
- Brought up to speed and re-factored outdated internal experiment backend, together with database schema
- Altered multiple internal frontends (written in AngularJS and React) to support new experiment features
- Dockerized and Kubernetized internal backends, frontends and data processing pipelines

The Hut Group
Graduate Data Scientist

Sept. 2020 – Dec. 2021
Manchester, UK

- Improved and automated manual tools surrounding internal A/B testing platform such as duration estimation, results generation or metrics addition. Improved and set up acceptance and integration testing for multiple components, and improved robustness of CI/CD pipelines.
- Built data pipelines from scratch, including setting up virtual machines, periodic scripts and CI/CD utilising Jenkins and github actions
- Took responsibility for the timely update and patch management of virtual machines to mitigate critical bugs and maintain system integrity

Lazarski University
Research Collaboration

June 2021 – Present
Warsaw, Poland

- Provided data analysis of the past treatments to determine the best treatment approach for birthmarks treatment
- Utilized CNN in combination with transfer learning to predict the patient's treatment's results based on patient's photo pre-operation.
- Applied cycleGAN together with Differential Augmntation to create a model that can translate between images of healthy faces and patient' faces - to make patient's aware

UCSD - Cognitive Robotics Laboratory
Research Assistant

September 2023 – Present
San Diego, USA

- I'm currently working on developing a new re-arrangement planning algorithm for a tabletop rearrangement task as a part of a bigger "home robot" project

Projects

Monet-me-this web app | *React, SpringBoot, Python, PyTorch, Linux*

November 2022

- Implemented a cycleGAN AI model that turns a simple image into a painting that closely resembles the style of the master painters such as Monet or Van Gogh.
- I developed and deployed a full-stack web application game where players must determine which images were generated by a famous painters and which by the AI.

Technical Skills

Languages: Java, JavaScript, SQL, Python, Shell, HTML/CSS, C++,
Frameworks: SpringBoot, Django, React, AngularJS, Pandas, Numpy, Matplotlib, PyTorch
Technologies/Tools:Docker, Jenkins, Kubernetes, Github actions, Latex

Publications

Journal Articles & Conference Proceedings
